

**If your MSP needs
three vendors to
answer one
question, nobody
owns your IT.**

**Tickets get closed.
Projects stall.
Leadership becomes
the escalation path.**

**Four owners of
fragments equals
zero owners of the
outcome.**

**Another tool or
another vendor adds
activity. It cannot
add ownership.**

**One operating
model: support,
security, cloud,
devices, sites,
vendors — one
accountable team.**

**You know who owns
the problem, what is
happening, and what
comes next.**

07 // NEXT STEP

**Want to see what
one accountable
model looks like for
your company?**
